INSURED WAGES TOTALED \$918.3 MILLION IN FISCAL 1972

INSURED JOBS AND WAGES INCREASE — An average of 137,833 workers employed in industries insured under Montana's Employment Security Law were paid wages of \$918,359,473 by 17,279 employers during the fiscal year 1972 (July 1, 1971 through June 30, 1972). The wage total was up \$112.4 million from fiscal year 1971 while the insured work force increased 10,303 along with a gain of 637 insured employers. Comparison of insured work force figures, employers and wages with prior years should take into account 1971 legislative amendments to the Montana Law. These added more than 300 employers and about 9,500 workers to insured coverage effective January 1, 1972. New employers included hospitals, non-profit organizations previously exempt, federal credit unions, state hospitals and university system units. Since the bulk of the newly covered employers are in the service industry group, substantial increases in employers, workers and wages for that segment are shown in the centerfold statistical summary.

SIX INDUSTRIES POST WAGE-JOB

GAINS — Led by an increase of \$36.1 million in wages for a total of \$119.2 million and a job increment of 6,343 (mainly because of 1971 legislative amendments) the service industries group held the No. 1 spot in gains over fiscal year 1971. The fast growing trade industry paid wages of \$275.9 million to more than 50,500 workers. Wage totals in this group were up \$27.5 million with 2,338 more workers on payrolls in fiscal year 1972. Other fiscal year 1972 wage totals with increases from fiscal year 1971 are in this order: contract construction, \$120.9 million, up \$19.5 million; manufacturing, \$197.7 million, up \$15.9 million; transportation, communications, and utilities, \$95.2 million, up \$11 million; and finance, insurance and real estate, \$55 million, up \$5.6 million. Falling to keep pace was the mining group which includes metal and coal mining, petroleum and natural gas production, and non-metallic mining and quarrying. This fiscal year 1972 wage total in this group at \$54.4 million was down \$3.4 million. There were 22 fewer employers with a loss of 1,207 workers.

(3) Employers whose operations are not ascribed to an individual county, includes firms with unit or operations organized on a multi-county pattern and reporting as a single enterprise. Also included are some employers whose base operations shift from one location to another, such as construction contractors. During the Fiscal Years 1970, '71, '72, approximately 50 of the larger employers who reported by unit were broken-out into the counties. This action increased the number of employers from fiscal 1969, and also decreased the multi-county employment and wages. The multi-county employers now represent only 3.0% of state total employment and 10.1% of total wages.

(4) Does not include employers who did not have employees during fiscal year. Employers are carried on Commission records until "none" reports have been received for two years.

County Wage Averages

Average earnings are derived from gross wages reported, divided by average number of employees on covered payrolls. Comparative figures for fiscal 1972 and 1971 appear below:
